

Fiber Management Panels

Amphenol FiberMOD Rack Mount Patch Panels provide a convenient point for patching and managing fiber optic cables. The modular and high density design of the FiberMOD panels make them ideal in data center applications, for use in the main distribution area and horizontal and equipment distribution areas. The patch panels provide easy access to the cable assemblies, suitable cable routing features, and bend radius protection for the fibers.

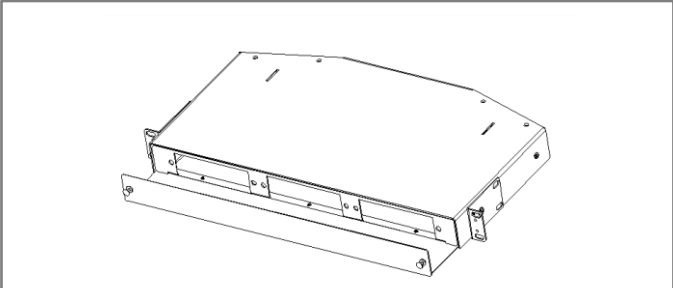

Features/ Benefits

- Sturdy 16 gauge steel and aluminum construction with durable black powder coat finish
- Removable doors provide increased enclosure access during installation and maintenance
- Reversible brackets allow panel to be mounted on either 19" or 23" racks
- Modular adapter packs or MPO cassettes can be pre-installed to reduce installation costs
- Variety of pre-terminated cable assemblies available pre-installed to further reduce field labor costs
- Panels provide ample room for storage of fiber slack while maintaining bend radius protection
- All enclosures include mounting hardware, installation instructions, and cable ties
- Available with Splice and Patch/Splice configurations
- Custom designs available
